PROFESSIONAL SUMMARY

Frontend Developer with industry internship experience building React and React Native interfaces, dashboards and AI assistant features for a fintech operations platform. Builds full-stack, AI-integrated products end to end using React, TypeScript, Supabase (Auth, PostgreSQL, Row Level Security) and the Gemini API, with automated tests and secure server-side AI integration. Three apps deployed on Vercel.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Frontend: React.js, React Native, Expo, Tailwind CSS, React Router, Recharts, Responsive Design, CSS Grid, Flexbox
State & Data: React Hooks, Context API, REST APIs, Fetch API, Form Validation, Error Boundaries
Backend & Cloud: Supabase (Auth, PostgreSQL, Storage, Row Level Security, Edge Functions), Vercel
AI Integration: Gemini API, LLM API Integration, Prompt Engineering, Structured JSON Outputs, Function Calling, Streaming Chat UI
Testing & Tools: Vitest, React Testing Library, ESLint, Git, GitHub, Vite, Expo CLI, Chrome DevTools, Postman, Figma
AI-Assisted Dev: Claude Code, GitHub Copilot, ChatGPT

WORK EXPERIENCE

Frontend Developer Intern – Velocity Tech June 2026 – August 2026

Lucknow, India | AI-Assisted Seller Reconciliation & Operations Platform

- **Reconciliation:** Built React interfaces to compare seller orders against settlement and payment records using searchable, filterable, paginated transaction tables with status indicators and discrepancy highlighting.
- **Returns, Refunds & RTO:** Developed workflows to track returned, cancelled, refunded and RTO orders, surfacing missing refunds, incorrect deductions and unresolved transactions.
- **AI Assistant:** Integrated LLM APIs into web and React Native apps and built dedicated AI chat sections that present reconciliation data as plain-language discrepancy explanations, issue categories and recommended next actions.
- **Dispute & Exception Management:** Built UI flows for reviewing mismatches, categorizing exceptions, adding remarks, updating resolution status and keeping case history.
- **Dashboards & Delivery:** Developed analytics dashboards for settlement, refund and discrepancy trends; shipped all work via Git/GitHub with backend, product and QA teammates.

PROJECTS

AutoCare 360 AI – AI Vehicle Health & Service Manager auto-care360-ai.vercel.app

React.js | Vite | Tailwind CSS | Supabase (PostgreSQL, Auth, Storage, RLS) | Gemini API | Vitest

- Built a full-stack platform for vehicles, service records, maintenance tasks, expense analytics (Recharts), document storage, reminders and five exportable PDF reports.
- Implemented Supabase email authentication with protected routes and Row Level Security on 12 tables, so each user accesses only their own data; covered by SQL-level RLS tests and a Vitest / React Testing Library suite.
- Integrated a streaming AI assistant and photo/document analyzer using Gemini behind a Supabase Edge Function: server-side API key, rate limits, prompt-injection safeguards, and AI-proposed actions that the user must confirm.

BPTrack – AI Blood Pressure Tracking App bp-track-q2l1.vercel.app

React Native | Expo | TypeScript | Supabase | Gemini API

- Built a cross-platform health app (Android, iOS, web) with Supabase authentication, expo-router navigation and per-user profiles and readings.
- Implemented manual entry, camera scan of BP monitor readings via Gemini vision, history, a 7-day trend dashboard and BP stage classification (Normal, Stage 1, Stage 2).
- Integrated the Gemini API to add an AI health assistant with text, image and voice (text-to-speech) support, plus exportable PDF reports.

FuelFind – Petrol Pump Locator & Emergency Services fuel-find-app.vercel.app

HTML5 | CSS3 | JavaScript (ES6+) | Geolocation API

- Built a responsive app with separate User and Owner flows: owners register stations and set availability; users search and filter by fuel type (Petrol, Diesel, CNG).
- Used browser geolocation to show distance, with one-tap call, map directions and an emergency modal (police, ambulance, roadside help) with WhatsApp sharing.

EDUCATION

Bachelor of Computer Applications (BCA) 2022 – 2025

Veer Bahadur Singh Purvanchal University, Jaunpur, Uttar Pradesh

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Web Technologies, DBMS, Computer Networks
